

Airbus EC-135 (H-135) Helicopter

The Airbus EC-135 (H-135) is a twin engine light helicopter. Frequently used as a MedEvac helicopter for civil or military use, it also is used as a combat military helicopter. The EC-135 is a high performance helicopter with a strong emphasis on passenger comfort. A spacious cabin with raised rear seating offers ease of assisting with patients. Other original medical hook-ups are within the cabin.
