

Bell UH-1H Huey Helicopter

The Bell UH-1H Huey helicopter was originally built for the U.S. Army and is mainly known for serving during the Vietnam War. Our Huey Buck is offered with a complete set of main and tail rotor blades. The cockpit panel is rewired to work on command by an operator. The cabin is offered with troop seats which can be removed. The main cockpit windows are wild for a clear view of the pilots during filming. We have made our Huey studio-friendly by removing the engine, hydraulics and fuel tanks.

Mockup Specs

Seating: 2 pilots and up to 8 military-type seating in rear cabin.
